## NADRASCA Residential Services

NADRASCA Residential Services are well established and have been providing accommodation services for adults with a disability since 1976. We are committed to providing holistic support that is person-centred and responsive to changing needs.

### Shared-Supported Accommodation

Ongoing support for clients is provided through shared-supported accommodation. This assistance aims to maintain and enhance people's level of independence, developing new skills in all areas of daily living. The service encourages people to lead full lives through networking and relationship building. This promotes inclusion and participation in the community. Quality service delivery is ensured through regular resident and staff meetings, and discussions with Community Visitors.

### Recreation Programs

An extensive range of leisure options available to consumers include: day, evening, weekend and holiday programs.

### Lead Tenancy & Independent Living

Residents in Lead Tenancies and those residing in Independent Living Units have access to limited need based outreach support. Lead Tenancy residences have informal support and supervision from a live-in volunteer. Residents must be able to manage money, travel independently, self-administer prescribed medication and live with minimal support.

### Aged Persons' Service

The NADRASCA Aged Persons' Service operates Monday to Friday 9am to 3pm and provides activities centred predominantly on art and craft, for those who have retired or are semi-retired.

*To obtain a permanent placement in a NADRASCA residency, you must be registered with the Department of Human Services. It is a requirement that a Service Needs Register (SNR) application form is completed and lodged with the Department of Human Services. For further information or assistance with completing this form, please contact the manager of NADRASCA Residential Services or the intake worker at your local Department of Human Services office.*

*As vacancies arise, the Department of Human Services and a selected panel will assess your application against compatibility and criteria attached to the vacancy.*
